RECOMMENDED ACTION			
Receive a presentation and an update on the Covington Woods Drainage Improvements Preliminary Engineering Report, CIP DR 1302.			

EXECUTIVE SUMMARY

In February 2013, the City Council authorized an award of a professional services contract to Lockwood, Andrews & Newnam, Inc for Capital Improvement Project, DR1302, Covington Woods Drainage Improvements Preliminary Engineering Report.

The goal of the Covington Woods Drainage Improvement Preliminary Engineering Report is to develop a holistic plan for the study area to address drainage deficiencies as determined by the policy language outlined in the Master Drainage Plan. This workshop will describe the study area, recount the history of the area, review the criteria outlined in the Master Drainage Plan, describe the resident involvement, provide a review of the recommended list of projects and review the associated costs. The consultant and city staff will present the results from the Preliminary Engineering Report and receive City Council input prior to completion of the report.
